

LIFETIME DIET & HEALTH PLAN

Telangana · Hyderabad · Tandur Region

Designed for: Mohd Afsar Hussain

Plan Goal	Reduce Subcutaneous & Visceral Fat Prevent Heart & Kidney Disease
Approach	Low Budget + Good Budget High Protein Local Telangana Foods
Duration	Lifetime Plan Month-by-month structure given
Region	Tandur, Telangana — culturally adapted meals

Note: This PDF is your complete health guide. Start with 2-3 changes per week. Do NOT try to do everything at once.

SECTION 1: BUDGET PLANS — LOW BUDGET vs GOOD BUDGET

LOW BUDGET PLAN — Rs. 60–90 per day (Rs. 1,800–2,700 per month)

This plan uses the cheapest local proteins and grains. No compromise on nutrition — just smart choices.

Food Item	Daily Quantity	Approx Cost/Day
Eggs	2 whole eggs	Rs. 12–16
Moong/Masoor dal	1 cup cooked	Rs. 8–10
Jowar / Bajra atta	200g (3–4 rotis)	Rs. 6–8
Seasonal vegetables	200–250g	Rs. 10–15
Roasted groundnuts	30g snack	Rs. 5
Toned milk	250 ml	Rs. 12–14
Homemade curd	1 small katori	Rs. 5 (make at home)
Brown rice	1 small cup cooked	Rs. 6–8
Fruits (seasonal)	1 guava / papaya	Rs. 8–10
Oil (groundnut)	3 tsp cooking	Rs. 4–5

Note: Total Low Budget: Rs. 76–91 per day. Groundnuts are the cheapest protein source in India. Eggs are the cheapest complete protein. Jowar, bajra, and ragi are cheaper than wheat and far healthier.

GOOD BUDGET PLAN — Rs. 120–160 per day (Rs. 3,600–4,800 per month)

Adds chicken, fish, paneer, nuts, and more variety. All local and seasonal.

Food Item	Daily Quantity	Approx Cost/Day
Eggs	2 whole eggs	Rs. 14–16
Chicken (2–3x week)	100g per serving	Rs. 20–25 avg/day
Fish (1–2x week)	100g per serving	Rs. 15–20 avg/day
Dal (moong/masoor/chana)	1 cup cooked	Rs. 8–10
Jowar / Bajra / Ragi atta	200g	Rs. 8–10
Brown rice	1 small cup	Rs. 8
Fresh vegetables (mixed)	300g+	Rs. 18–22
Curd/paneer	100g	Rs. 12–15
Toned milk	500 ml	Rs. 22–25
Almonds + walnuts	6 almonds + 2 walnuts	Rs. 10–12
Seasonal fruits	1–2 pieces	Rs. 12–15
Cold-pressed groundnut oil	3–4 tsp	Rs. 6–8

Note: Good Budget: Rs. 133–158 per day. This is still extremely affordable compared to buying junk food, biscuits, and cold drinks which easily cost Rs. 50–80/day with zero nutrition.

SECTION 2: MONTHLY SHOPPING LIST

Buy these at the **START** of every month. Fresh produce buy 2–3x per week.

Category	Items to Buy	Qty/Month	Budget
Grains (Staples)	Jowar atta, Bajra atta, Ragi atta, Brown rice, Rolled oats, Whole wheat atta	2–3 kg each	Rs. 400–600
Dals & Legumes	Moong dal (whole), Masoor dal, Chana dal, Rajma, Kabuli chana	500g–1kg each	Rs. 300–450
Cooking Oil	Cold-pressed groundnut oil (primary) Sesame oil (secondary) Pure cow ghee (200g only)	1L + 200ml + 200g	Rs. 350–500
Nuts & Seeds	Groundnuts (roasted, unsalted), Flaxseeds (alsi), Sesame (til), Almonds, Walnuts	250–500g each	Rs. 300–500
Spices & Health Items	Turmeric, Jeera, Dalchini, Ajwain, Methi seeds, Curry leaves, Dry ginger, Amla powder, Moringa powder	As needed	Rs. 150–200
Dairy (Weekly)	Toned milk (1L/day), Make curd at home, Buttermilk (chaas) — make at home	30L/month	Rs. 700–900
Protein (Weekly)	Eggs (8–10/week), Chicken 500g/week, Fish 2x/month, Sprouts (make at home)	Weekly buy	Rs. 800–1200
Vegetables (2–3x/week)	Tomatoes, Onions, Garlic, Ginger, Palak, Methi, Gongura, Bhindi, Brinjal, Lauki, Cabbage, Carrot	200–300g/day	Rs. 600–900
Fruits (2x/week)	Guava, Papaya, Amla, Banana, Watermelon, Mosambi — seasonal only	1–2 pieces/day	Rs. 300–450

TOTAL MONTHLY FOOD COST	Low Budget	Good Budget
Estimate	Rs. 1,800 – 2,700	Rs. 3,600 – 4,800

SECTION 3: CHAI HABIT — THE SILENT HEALTH KILLER

Most Telangana people drink 3–6 cups of chai daily — usually with biscuits, bread, or rusk. This contributes hidden sugar, refined carbs, and trans fats to the diet every single day.

How to Fix Your Chai Habit — Permanently

Rule	What to Do	Why
Reduce quantity	Maximum 2 cups per day	More than 2 cups = excess caffeine, anxiety, poor sleep
Fix the recipe	Half milk + half water. Small pinch jaggery or no sugar	Full milk chai = 60–80 calories per cup. This halves calories
Add healing spices	Ginger + dalchini (cinnamon) + elaichi + tulsi	Controls blood sugar, improves digestion
Never on empty stomach	Always eat something first, then chai	Empty stomach chai causes acidity, weak bones over time
Replace 1 cup	Replace afternoon chai with chaas (buttermilk)	Chaas has protein + probiotics. Zero harm, maximum benefit

What to Eat WITH Chai (Replace Biscuits Forever)

STOP Eating This	START Eating This Instead	Why It's Better
Parle-G, Bourbon biscuits	6–8 roasted groundnuts + 1 walnut	Real protein + healthy fat vs. sugar + maida
White bread toast	1 jowar/bajra roti + thin ghee	Fibre + minerals vs. empty carbs
Rusk	Handful roasted chana	25g protein per 100g, very cheap
Glucose biscuits	1 boiled egg or small sprouts katori	Complete protein vs. pure sugar bomb
Namkeen / Mixture	Fresh coconut pieces or amla	Healthy fat + Vitamin C vs. fried salt+oil
Packaged cream biscuits	2 dates + 4 almonds	Natural sugar + magnesium vs. trans fat

Note: ONE BISCUIT PACK (100g Parle-G) = 450 calories, 75g carbs, 14g fat, almost ZERO protein. Compare: 30g groundnuts = 170 calories, 7g protein, good fat, minerals. The choice is clear.

SECTION 4: DAILY MEAL STRUCTURE — FOLLOW EVERY DAY

This timing structure is the foundation of the entire plan. Stick to these timings and you will never feel weak or extremely hungry.

Time	Meal	Purpose
6:00–6:30 AM	Wake-up drink	Kickstart digestion and metabolism
7:30–8:00 AM	Breakfast	Most important meal — fuel your brain and muscles
11:00–11:30 AM	Mid-morning snack	Prevent blood sugar crash, avoid overeating at lunch
1:00–1:30 PM	Lunch	Largest meal of the day — all food groups present
4:00–4:30 PM	Evening snack	Prevent binge eating at dinner, healthy energy
7:00–7:30 PM	Dinner	Lightest meal — easy to digest before sleep
9:30 PM max	Only if very hungry	Warm milk or chaas only — NOTHING solid

GOLDEN RULES

Rule 1	Eat dinner BEFORE 8 PM — after 8 PM all calories store as fat
Rule 2	Eat breakfast WITHIN 1 HOUR of waking up — do not skip
Rule 3	Every meal must have protein (egg/dal/curd/chicken/sprouts)
Rule 4	Eat in order: Raw salad first -> Dal/Protein -> Rice/Roti last
Rule 5	Drink water 30 min BEFORE meals, not during or immediately after
Rule 6	Chew each bite 20-25 times — this alone reduces overeating by 30%

SECTION 5: WEEK 1 FULL MEAL PLAN

Week 1 is your transition week. Your body is adjusting. Do not force everything at once. This is your **TEMPLATE** — repeat the pattern every week with variations from Section 6.

Every morning wake-up drink: 1 glass warm water + juice of half lemon + pinch of turmeric OR jeera water (boil 1 tsp jeera in 1 glass water)

MONDAY

Breakfast	Poha (thin) with groundnuts + curry leaves + mustard seeds + 1 boiled egg + 1 cup chaas
Mid Snack	6 almonds (soaked overnight) + 1 guava
Lunch	1 cup brown rice + sambar (with 4–5 vegetables) + bhindi/lauki sabzi + 1 katori curd
Evening	Masala chai (half milk, low sugar) + handful roasted chana
Dinner	2 jowar rotis + moong dal tadka + cucumber-tomato salad + chaas

TUESDAY

Breakfast	Oats upma (oats + onion + tomato + jeera + curry leaves + groundnuts) + 1 katori curd
Mid Snack	1 banana + 4 walnuts
Lunch	2 jowar/bajra rotis + rajma curry + raw onion-lemon salad + chaas
Evening	Green tea (no sugar) + boiled moong sprouts with lemon + green chilli
Dinner	Vegetable soup (lauki-based) + 1 egg omelette (2 eggs) + 1 small roti

WEDNESDAY

Breakfast	Ragi mudde (small) OR ragi dosa + sambar + 1 cup toned milk
Mid Snack	Papaya (1 bowl) + 2 dates
Lunch	Brown rice + gongura dal (classic Telangana!) + any stir-fried vegetable
Evening	Chaas (buttermilk, spiced with jeera+salt) + roasted groundnuts
Dinner	2 whole wheat rotis + palak sabzi + 1 egg boiled + salad

THURSDAY

Breakfast	2–3 idli (fermented = probiotic gut health) + sambar + coconut chutney (small) + 1 egg
Mid Snack	Fresh amla (1–2) or amla candy (no sugar coating) + 6 almonds
Lunch	Brown rice + chicken curry (less oil, tomato-onion base) + salad + curd
Evening	Masala chai + 1 jowar roti with peanut chutney
Dinner	Dal khichdi (moong dal + brown rice 1:1) + 1 tsp ghee + small pickle

FRIDAY

Breakfast	Besan chilla (gram flour pancake with onion, tomato, green chilli) + 1 katori curd
Mid Snack	Watermelon (1 bowl) OR any in-season fruit
Lunch	2 bajra rotis + fish curry (local style, minimal oil) + vegetable sabzi
Evening	Jeera water + 1 boiled egg OR sprouts chaat
Dinner	Bhindi/brinjal stir fry + 2 rotis + masoor dal

SATURDAY

Breakfast	Pesarattu (green moong dosa) — high protein Telangana classic + sambar + 1 glass milk
Mid Snack	Roasted chana + fresh coconut pieces (small amount)
Lunch	Brown rice + egg curry OR paneer bhurji + sabzi + chaas
Evening	Chaas OR green tea + small handful peanuts
Dinner	Tomato soup OR dal soup + 2 ragi rotis + salad

SUNDAY

Breakfast	Upma (semolina with extra vegetables) + curd — relaxed day, 1x/week only
Mid Snack	Fresh seasonal fruit bowl (papaya, guava, watermelon)
Lunch	Slightly relaxed — brown rice + 2 curries + curd + 1 roasted papad
Evening	Family chai time — follow healthy chai rules (half milk, low sugar)
Dinner	Light — khichdi OR dal + 1 roti + chaas. NO heavy dinner even on Sunday.

SECTION 6: WEEK 2–4 ROTATION MEALS (Avoid Boredom)

Use the Week 1 structure every week. Rotate breakfast, lunch, and dinner from this list so you never eat the same thing every day. Your taste buds will stay happy and your nutrition stays diverse.

Breakfast Rotation (choose any — rotate daily)

Option	Meal	Protein Source	Budget
A	Ragi malt (ragi + milk/water + jaggery)	Ragi + milk	Low
B	Pesarattu (green moong dosa) + sambar	Moong protein	Low
C	2 boiled eggs + 1 roti + 1 fruit	Eggs	Low
D	Sprouts chaat (moong+chana+tomato+lemon)	Sprouts	Low
E	Oats (savory — with vegetables, no sugar)	Oats + milk	Low
F	Besan chilla (2–3 pieces) + curd	Gram flour	Low
G	Idli (2–3) + sambar + egg	Idli + egg	Low
H	Ragi mudde + sambar	Ragi	Low
I	Poha + groundnuts + egg	Egg + nuts	Low
J	Vegetable upma (1x/week max)	Semolina mild	Low

Lunch Rotation — Grains (rotate every 2 days)

Grain Option	Best Paired With	Health Benefit
Brown rice	Dal + vegetable + curd	Lower GI than white rice
Jowar roti (2)	Any curry or dal	High fibre, iron, controls sugar
Bajra roti (2)	Rajma or chana curry	Heart-healthy, iron, warm grain
Ragi mudde	Sambar or gongura dal	Calcium, blood sugar control
Foxtail millet rice	Any Telangana curry	Low GI, rich in B vitamins
Little millet	Chicken or egg curry	Protein + light on stomach

Lunch Rotation — Proteins (rotate 4–5 times per week)

Protein	Preparation	Frequency
Eggs (2)	Curry, omelette, boiled	Daily is fine
Chicken	Curry, grilled, dry fry	2–3x per week
Fish	Local curry style (less oil)	1–2x per week
Moong/Masoor dal	Dal tadka or sambar	Daily
Rajma / Chana	Curry form	2x per week
Paneer (homemade)	Bhurji or sabzi	1x per week
Sprouts	Chaat or light sabzi	3–4x per week

Dinner Rotation (always light — never heavy)

Dinner Option	Components	Note
Dal khichdi	Moong dal + brown rice + ghee (1tsp)	Easiest on digestion
Roti + dal	2 rotis + any dal	Quick and filling
Vegetable soup + roti	Lauki/tomato soup + 1 roti	Low calorie, satisfying
Egg + salad + roti	Omelette + raw vegetables + 1 roti	High protein dinner
Sprouts sabzi + roti	Stir-fried sprouts + 2 rotis	Plant protein night
Ragi mudde + sambar	Small mudde + light sambar	Traditional Telangana

SECTION 7: RESTAURANT / DHABA / THELA FOOD — REALISTIC GUIDE

You will eat out. Life happens. Here is how to enjoy food outside without ruining your health. The goal is not to feel guilty — it is to make smarter choices every time.

How Often to Eat Out: Maximum 2–3 times per month for heavy food

Food	Smart Way to Eat It	Limit
Biryani (hotel)	1 plate only. Add raita (curd). Walk 15 min after.	1x/month
Dal makhani/tadka	Good choice — pair with roti not naan/paratha	Fine 2–3x/month
Tandoori chicken	Excellent choice — least oil, high protein	Fine regularly
Paneer dishes	Avoid butter masala (cream). Choose paneer bhurji.	1–2x/month
Dosa at hotel	Good — skip excess ghee, choose sambar dosa	Fine regularly
Egg bhurji thela	Great street option — high protein, affordable	Fine regularly
Roti + sabzi at dhaba	Good honest food — ask for less oil	Fine regularly
Pongal/khichdi	Light, digestible — good hotel choice	Fine regularly

Pani Puri / Mirchi Bajji / Other Street Food

Street Food	How Much is OK	What to Avoid
Pani puri	4–6 pieces max. Ask for less puri, more pani (tamarind water is actually healthy)	More than 6 pieces
Mirchi bajji	1–2 pieces only. Mostly air inside — besan coating is the carb risk	Eating 5–6 at once
Samosa	1 maximum — maida + fried potato. Not regular food	Daily or 3–4 at once
Dahi puri / Sev puri	3–4 pieces. Curd inside is healthy	More than 6 pieces
Fruit chaat	Any quantity — excellent healthy snack	Adding too much salt/masala
Roasted corn	1 cob — good fibre, natural sugar	Butter overload versions
Egg rolls/thela	1 roll — choose with vegetables inside	Maida-based rolls
Fried rice/noodles	Avoid or eat very small quantity — maida+MSG+refined carbs	Regular consumption

AFTER EATING OUT — DAMAGE CONTROL

Step 1	Walk 15–20 minutes immediately after the meal
Step 2	Next meal of that day: very light (only dal + 1 roti or just fruits)
Step 3	Drink 2 extra glasses of water compared to normal that day
Step 4	Do not fast the next day — eat normally. Fasting after binge = worse metabolism
Step 5	Never feel guilty. One meal never made anyone unhealthy. It is DAILY habits that matter.

SECTION 8: HEART & KIDNEY PROTECTION — SPECIFIC FOODS

Foods That PROTECT Your Heart

Food	How to Use	Heart Benefit
Flaxseeds (alsi)	Grind 1 tbsp, add to dal/roti dough	Omega-3, reduces bad cholesterol (LDL)
Walnuts (2–3 whole)	Daily as snack	Omega-3, reduces inflammation
Garlic (2–3 cloves)	Daily in cooking — crush before use	Lowers blood pressure naturally
Gongura (sorrel leaves)	Dal or chutney — eat 3–4x/week	Antioxidants, very local Telangana food
Groundnut oil (cold-pressed)	Max 4 tsp/day for cooking	Monounsaturated fats, heart safe
Oats	Breakfast 3–4x/week	Beta-glucan fibre lowers cholesterol
Amla (Indian gooseberry)	1–2 daily fresh or powder	Vitamin C, prevents arterial damage
Moringa (drumstick leaf)	Add powder to dal or rice	Reduces inflammation, lowers BP

Foods That PROTECT Your Kidneys

Habit/Food	How to Do It	Kidney Benefit
Water intake	3–4 litres per day minimum	Flushes toxins, prevents kidney stones
Coconut water	3–4 times per week	Natural electrolytes, reduces stone risk
Moong dal	Eat daily — easiest on kidneys	Lowest phosphorus among all dals
Reduce salt	Use rock salt (sendha namak). Max 1 tsp/day	Reduces BP and kidney stress
Limit pickles/papad	Max 1 small piece per day	High sodium = kidney damage over years
Bottle gourd (lauki)	Curry, soup, or juice	Cools kidneys, reduces stone formation
Avoid protein overload	0.8–1g per kg body weight per day	Excess protein strains kidneys long-term

Note: Blood Sugar Rule: Eat in this ORDER at every meal — Raw salad first > Dal/Protein > Rice/Roti last. This simple trick reduces blood sugar spike by 30–40% proven by research.

SECTION 9: DAILY HABITS FOR A LONG & HEALTHY LIFE

Time of Day	Habit	Duration	Importance
6:00 AM	Wake-up drink (lemon/jeera water)	5 min	HIGH
6:15 AM	Light walk or stretching / yoga	15–20 min	HIGH
After breakfast	Short walk outside	5–10 min	MEDIUM
After lunch	Walk — this one lowers blood sugar	10–15 min	VERY HIGH
5:00–6:00 PM	Main exercise (walk/jog/yoga)	30 min	VERY HIGH
After dinner	Short walk — never sit immediately	10 min	HIGH
9:30–10:00 PM	Sleep — no phone 30 min before	7–8 hours	CRITICAL

The 3-Month Habit Building Schedule

Month	Focus Habits to Build	Do Not Worry About
Month 1	Cut biscuits with chai. Switch to toned milk. Drink 3L water daily. Eat breakfast before 11 AM or evening	Perfect diet or exercise routine yet
Month 2	Replace 1 white rice meal with jowar/bajra roti. Eat dinner before 8 PM. Add sports or yoga daily	Excess calories daily or start 20 min walking.
Month 3	30 min walk daily — consistent. Reduce chai to 2 cups. Cut restaurant to 2x/month. Add weekly fish	Perfection or consistency
Month 4+	This is now your lifestyle. Maintain all habits. Add strength exercises 2–3x/week	Maintenance is the achievement

Sleep — The Most Underrated Health Tool

- Sleep 7–8 hours every night — poor sleep increases visceral fat even with perfect diet
- Sleep before 11 PM — after 11 PM your cortisol (stress hormone) rises and stores fat
- No food 2–3 hours before sleeping — digestion interrupts deep sleep
- No phone/screen 30 minutes before bed — blue light prevents sleep hormone release
- A dark, cool room improves sleep quality significantly

SECTION 10: STOP THESE FOREVER — THE PERMANENT DON'TS

STOP This	Why It is Harmful	Replace With
Maida products daily (bread, puri, naan, etc.)	Spikes blood sugar, zero nutrition, builds visceral fat	Jowar/bajra/ragi rotis
Packaged biscuits (daily habit)	Hidden sugar + trans fat + maida = silent heart attack risk	Roasted groundnuts or chana
White rice as 80% of every meal	Very high glycemic load — zero protein, builds fat	Brown rice + dal combination
Cold drinks / Soda / Cola	10+ teaspoons sugar per bottle. Directly causes fatty liver	Chaas, coconut water, jeera water
Vanaspati / Dalda / Margarine	Trans fat — scientifically proven worst food for heart	Cold-pressed groundnut oil + ghee
Eating dinner after 9 PM	Body stores all calories as fat during sleep	Eat dinner by 7:30 PM
Skippping meals then binge eating	Destroys metabolism, worsens visceral fat rapidly	Eat every 3–4 hours, small amounts
Fried food daily (poori, bhajji)	Oxidized oils at high heat damage arteries directly	Air fry or dry roast or steam
Refined sunflower / palm oil	High omega-6, promotes inflammation, causes PCOD/hepatitis	At least 1/3 coconut or sesame oil only
Sugar in chai (3+ cups/day)	5–10 grams sugar x 5 cups = 50g hidden sugar daily	Reduce to 2 cups, use small jaggery

SECTION 11: WHAT TO EXPECT — MONTH BY MONTH RESULTS

Month	Physical Changes	Health Improvements
Month 1	Less bloating. Better morning energy. Skin starts clearing.	Digestion normalises. Acidity reduces. Less afternoon drowsiness.
Month 2	Clothes feel slightly looser. Face looks fresher.	Blood sugar more stable. Less hunger crashes. Better mood.
Month 3	Visible reduction in belly fat. Better stamina.	Cholesterol numbers improve. Blood pressure reduces.
Month 4–5	Clear change in body shape. Subcutaneous fat reduces.	More energy throughout day. Better sleep quality.
Month 6	Significant visceral fat reduction (the dangerous internal fat).	Blood reports show improvement. Doctor notices difference.
Month 12+	Sustainable healthy weight. You no longer feel like it is a diet.	Reduced risk of heart disease, diabetes, kidney disease — for good.

Note: Visceral fat (fat around organs) is the most dangerous type. It responds FIRST to dietary changes — usually visible in blood reports within 3–4 months of following this plan consistently.

DAILY CHECKLIST — Print This Page and Tick Every Day

Today's Health Checklist	Done?
Drank 3+ litres water today	☐
Ate protein at EVERY meal (egg/dal/curd/chicken/sprouts)	☐
Had vegetables with lunch AND dinner	☐
Did NOT skip breakfast	☐
Walked at least 20–30 minutes	☐
Chai limited to 2 cups, low sugar	☐
Finished dinner before 8 PM	☐
Ate a fruit today	☐
Had curd or chaas today	☐
Slept 7–8 hours last night	☐

YOUR FINAL REMINDER — READ THIS WHEN YOU FEEL LIKE GIVING UP

This is NOT a temporary diet. This is a return to the way your ancestors in Telangana always ate — jowar rotis, gongura dal, fresh vegetables, curd, small amounts of ghee, groundnuts. They were lean, strong, and lived long lives. You are just going back to your roots with a modern understanding of WHY it works.

The goal is not to suffer or to feel restricted. The goal is to eat ENOUGH of the RIGHT things so you feel full, strong, and healthy every single day.

You will have bad days. You will eat a biryani at a wedding. You will eat mirchi bajji at a thela. You will miss your morning walk. That is completely normal and completely fine. ONE bad day or ONE bad meal has NEVER made anyone unhealthy. It is what you do on the other 29 days of the month that matters.

Start with just 2–3 changes this week. Not everything at once. Build one habit at a time. In 3 months, you will not recognise how you feel compared to today.

Your body is capable of healing itself when you give it the right food. Trust the process. Be patient. Be consistent.
